Sy-Klone International's Conflict Minerals Declaration

In order to further the humanitarian goal of ending violent conflict in the Democratic Republic of the Congo and surrounding countries ("Conflict Region"), which has been partially financed by the exploitation and trade of tantalum, tin, tungsten and gold ("Conflict Minerals"), Sy-Klone International supports the following requirements to ensure that only "Conflict Free" materials, components and parts are used in products that we procure and assemble.

SY-KLONE INTERNATIONAL'S COMMITMENT:

1. Support the aims and objectives of the U.S. legislation on the supply of Conflict Minerals.
2. Only include Conflict Minerals in product specifications if/when necessary, and in these instances, do not knowingly procure Conflict Minerals that originate from facilities in the Conflict Region, unless certified as Conflict Free.
3. Ensure compliance with the above requirements, and ask our suppliers to undertake reasonable due diligence with their supply chains to assure that specified metals, if required in a product, are being sourced only from:
 - Mines and smelters outside the Conflict Region, or
 - Mines and smelters that have been certified by an independent third party as Conflict Free if sourced from within the Conflict Region.

Sy-Klone International has asked, and will continue to require of our suppliers, that they identify any Conflict Minerals that they use in the manufacturing or purchasing of material that Sy-Klone International sources from them and that they either: (a) do not contain Conflict Minerals or (b) if they do contain Conflict Minerals, that they originate from non-conflict sources or from scrap or recycled sources.

At this time, Sy-Klone International can represent that none of our product specifications call for the use or inclusion of any Conflict Minerals and it is our expectation that our products are manufactured to specifications, such that no Conflict Minerals should be present in any of our products. Further, based on active due diligence in the supply chain discipline and information/certification requested/required from our suppliers, Sy-Klone International certifies that, to the best of its knowledge, our products do not contain Conflict Minerals covered by the SEC's disclosure rules.
