Sy-Klone International's Restriction of Hazardous Substances (RoHS) Compliance Declaration

Sy-Klone International's products are generally complex objects, comprised of components from multiple suppliers, and the individual components often include multiple articles. This statement confirms that Sy-Klone International is aware of the requirements imposed by the Directive on the restriction on the use of certain hazardous substances in electrical and electronic equipment (RoHS 3 - Directive 2015/863EU). To Sy-Klone's best knowledge and belief, based on active due diligence in the supply chain discipline and information/certification requested/required from our suppliers, none of the articles used in the construction of Sy-Klone's products contain any known or intentionally added restricted substances as listed in the referenced regulations in concentrations above limits specified in the regulations.

In providing information regarding the substances contained in its products, Sy-Klone International is relying on the material suppliers for declarations, certifications, notifications and/or available MSDS regarding the materials within the products being supplied by Sy-Klone. We have not conducted independent tests to determine the presence of the regulated substances and Sy-Klone makes no warranties, express nor implied, and assumes no liability related to any use of this information. All information is provided to the best of Sy-Klone's knowledge using the raw material documentation available from raw material suppliers. In the event more information is required, we would suggest that appropriate analytical testing be conducted. This proprietary information is considered Confidential and should only be used for environmental, health, and safety purposes.
